

Roles of aerosol, cloud and associated radiative feedbacks in the recent Arctic warming

Hailong Wang, Rudong Zhang, Yang Yang, Qiang Fu, Philip Rasch

- a) Comparison of radiative feedbacks between CMIP (4xCO₂) and AMIP (1980-2014)
- b) Contributions to Arctic amplification (AA) by individual feedbacks
- c) 20% of recent Arctic warming attributed to sulfate and BC changes (ARI+ACI)
